

Dear Mr. President,

My name is Carter. I'm in the 8th grade and I go to Edythe Jones Hayes Middle School. I'm from Lexington, Kentucky. Recently I've been seeing the news and I mostly care about Democracy.

I'd want the future president to do something about global warming, pollution, healthcare and the ongoing pandemic. The president should focus on global warming, pollution, healthcare, and the ongoing pandemic. He ought to focus on global warming along with pollution because it's a problem that we have to discuss and fix. Billions of plastic enter the ocean every year polluting our drinkable water. There are many types of pollution, like air pollution, water pollution, and soil pollution. Healthcare is also a problem due to the ongoing pandemic, there is a shortage of healthcare workers and medical supplies, higher costs for health care, and a longer wait for access to care. The ongoing pandemic, the Coronavirus is taking more lives every day, the hospitals are running out of medical supplies, beds, and ventilators. Mr. President-Elect, Joe Biden, what are you going to do about the ongoing pandemic? What are some of the issues you and your team are going to be working on in the next 4 years? Is there anything we can do as students? To be honest I'm worried about the next 4 years. I'm worried about what life will be like. However, I'm also excited to return back to in-person interactions and school.

Sincerely, Carter
